

PRODUCT INTRODUCTIONS

SANYO Case Information Media Management

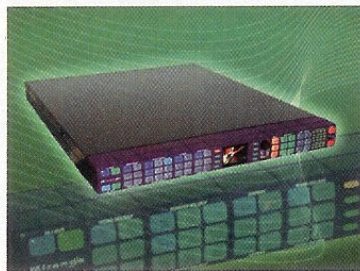

CIMM is an interview recording solution for law enforcement that helps organize every piece of evidence relating to an individual case. Recording interviews requires no more than the touch of a single button. CIMM case files are built by the user and can include any recorded interviews associated with the case, plus relevant documents, images, audio files, or video clips. The system is also easily searchable for archived files, which can be added to the case file. And any part of a case can be exported easily to virtually any consumer DVD player.

MIRANDA TECHNOLOGIES JAZZ-800

Ideal for mobile trucks and network feed centers, the JAZZ-800 single/dual channel universal signal processor offers up/down/cross conversion plus A/D and D/A in a 1 RU package. It provides high quality conversion using pixel motion de-interlacing, and it offers HD/SD motion adaptive noise reduction. There's also flexible aspect ratio conversion using the common presets, as well as nonlinear anamorphic conversion. The integral audio processing can operate with eight AES pairs, 16 channels of embedded audio, and eight analog audio channels. A local control panel features user-friendly menu, as well as an integral video monitoring capability.

SMARTSOUND

Sonicfire Pro 4.5

The new version of this music scoring software features Smart Recall, which brings new customization options to music tracks exported as standard audio file formats. Scores that have been exported as WAV or AIFF files are now

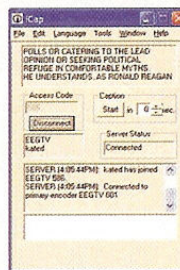

embedded with the project information used to create the track. Also, a new network version of Sonicfire Pro 4.5 means multiple workstations can use the software while the entire SmartSound music library is centrally located on a network drive.

EEG iCap

The iCap Realtime IP Caption Link uses IP connections to improve audio quality, reduce delay times, improve cost efficiency, and establish a more secure caption environment. The iCap system's intuitive GUI enables a host of new services, solving many common administrative problems experienced by captioners, caption agencies, and broadcasters. Working in conjunction with EEG's 1 RU HD480 Smart Encoder V HD/SD server, iCap is completely compatible with pre-existing captioning software packages.

BOOK REPORT

HDTV AND THE TRANSITION TO DIGITAL BROADCASTING

BY PETER CIANCI

This book bridges the gap between technical and non-technical personnel by giving you a working knowledge of digital television technology, a clear understanding of the challenges of HDTV and digital broadcasting, and a scope of the ramifications of HDTV in the consumer space. It provides clear explanations of the technologies you need to understand to talk with engineers and other broadcast technology professionals, as well as historical and technical overviews of DTV, HDTV, standards, and organizations. Topics include methodologies and issues in HD production and distribution, as well as HDTV's impact on the future of the media business.
